SUMMARY

Full Stack Software Engineer with 4+ years of experience building production software for B2B commerce and healthcare: React and Next.js front ends, Node.js and Python (FastAPI) back ends, REST APIs, and third-party marketplace integrations on PostgreSQL and MongoDB. Former co-founder and CTO of a healthcare startup, building its product from scratch. Builds LLM features (RAG, embeddings, vector search) into real applications.

TECHNICAL SKILLS

Languages: JavaScript (ES6+), TypeScript, Python, SQL, HTML5, CSS3
Frontend: React.js, Next.js, Tailwind CSS, responsive UI, dashboards, Progressive Web Apps (PWA)
Backend: Node.js, Express.js, FastAPI, REST API design, authentication, third-party API integrations, background sync jobs
Databases: PostgreSQL, MongoDB, Mongoose, aggregation pipelines, schema design, query optimization
AI / LLM: LLM API integration, Retrieval-Augmented Generation (RAG), embeddings, vector search, AI workflows
Cloud & DevOps: AWS, GCP, Docker, CI/CD, Git, GitHub
Practices: Agile, code review, automated testing, debugging, production support, performance optimization

PROFESSIONAL EXPERIENCE

Software Engineer (Full Stack), Modern Techserv India (OneChannelAdmin) **Jul 2023 – Present**
Remote | B2B multi-channel commerce and marketplace management platform

- Build and maintain full-stack features for a multi-channel commerce platform that helps sellers manage listings, inventory and orders across multiple marketplaces and e-commerce channels, using React, TypeScript, Node.js and REST APIs.
- Own third-party marketplace integrations end to end: API design, data mapping, sync jobs and production debugging for catalog, inventory and order synchronization.
- Write and optimize PostgreSQL queries and MongoDB aggregation pipelines behind reporting and operational dashboards, tuning slow queries and aggregation logic for faster reporting.
- Resolve production incidents in data-sync workflows through root-cause fixes, input validation and better error handling, improving sync reliability for sellers.
- Ship through Git-based CI/CD pipelines and containerized cloud deployments; review code and work with product and support teams in Agile sprints.

Co-founder & CTO, Ayum Healthcare **Jul 2022 – Apr 2023**
Healthcare technology startup

- Co-founded the company and led all engineering for a platform covering doctor discovery, appointments, pathology booking, home sample collection and digital lab reports.
- Built the product as a Progressive Web App with Next.js, React, Node.js, MongoDB and AWS, including authentication, booking APIs and data models for clinics, patients and appointments.
- Built Ayum Doctor, pharmacy software for medical stores covering prescriptions, billing, inventory and customer management.
- Part of the founding team selected for state incubation, receiving an INR 1 lakh seed grant from the Madhya Pradesh Government.

Full Stack Developer Intern, Sortwind Pvt. Ltd. **Oct 2022 – Dec 2022**

- Built, tested and debugged frontend and backend features and API integrations for production web applications.

PROJECTS

ReelStudio: Local Video Editing Toolkit | Next.js, React, TypeScript, Remotion, Node.js

- Built a local-first editor that turns a recorded clip and a subtitle file into a finished short-form video, with word-timed captions, animated maps, zooms and titles driven by a JSON cue sheet.
- Wrote an SRT parser for word-level timing, a live preview with validation, and Node.js CLI tools for setup and rendering; runs fully offline. Used to produce reels for my tech Instagram channel, @anuraag.dev.

AI Knowledge Assistant (RAG) | Python, FastAPI, embeddings, vector search, LLM APIs

- Built a retrieval-augmented Q&A assistant: document ingestion and chunking, embedding generation, vector search and LLM answer generation, served through FastAPI endpoints.

EDUCATION

B.Tech, Computer Science & Engineering **2019 – 2023**
Jawaharlal Nehru College of Technology, Rewa (RGPV Bhopal) | CGPA: 8.71 / 10
